NOTARY PUBLIC in and for the State of Texas

My commission expires 01/09/2023

Subscribed and sworn to before me this 15<sup>th</sup> day of May, 2020

On June 7, 2019, Southwestern Public Service Company ("SPS"), doing business as Xcel Energy, filed an application with the Public Utility Commission of Texas ("Commission") for authority to revise its fuel factor formulas for its Texas retail jurisdiction by approving a new formula and to change the fuel factors derived from that formula. The filing has been assigned Docket No. 49616. If approved, the new fuel factors derived from the formula proposed in SPS's Application will affect all of SPS's Texas retail customers and retail rate classes within its Texas service territory. The revised fuel factors will affect only the fuel portion of rates charged by SPS in Texas and will not affect SPS's non-fuel base rates.

This revision is necessary due to the addition of the Hale Wind Project into SPS's owned resource mix, as well as overall changes in system average fuel and purchased power costs, and impacts resulting from the start of the Southwest Power Pool Integrated Marketplace. Compared to fuel factors in place at the time SPS filed its Application, a residential customer using 1,000 kWh of electricity per month will see an approximate decrease of 3.25% to their total bill or \$3.73 on average per month from June through September. Based on the data available at the time of SPS's Application, the proposed fuel factors, differentiated by customer voltage level are as follows:

	Current Summer Fuel Factors	Current Winter Fuel Factors	Proposed Fuel Factors
	June – Sept.	Oct. – May	
	\$/kilowatt hour ("kWh")	\$/kWh	\$/kWh
Fuel Factor			\$0.016118
Voltage Level Fuel Factors			
Secondary Distribution	\$0.022430	\$0.023058	\$0.016852
Primary Distribution	\$0.022011	\$0.022627	\$0.016537
Sub-transmission	\$0.020682	\$0.021261	\$0.015491
Backbone Transmission	\$0.020527	\$0.021101	\$0.015397

Please note that the actual fuel factors may be higher or lower than those shown in the table above depending on updates to gas prices forecasts that may occur during the pendency of this case.

SPS requests that the new fuel factors be implemented on July 1, 2019 or, alternatively, the first day of the month following the month in which the Commission approves the new fuel factor formulas, and remain in effect until the Commission approves a revision to the fuel factors. These changes will be subject to final review by the Commission in SPS's next fuel reconciliation proceeding. SPS also requests approval to begin charging as interim rates the proposed fuel factors set forth in the table above for electricity usage occurring on or after July 1, 2019.

SPS further requests that the Commission grant a good cause exception and allow SPS to include a term in the Fuel Formula for credits for payments received from Lubbock Power & Light ("LPL") for capacity reserves purposes to permit the treatment of these payments with eligible fuel cost calculations; and that the Commission allow the LPL term to be set to zero following the conclusion of the payments.

Persons with questions or who want more information on this application may contact SPS at 790 S. Buchanan St., Amarillo, Texas 79101, or call 1-800-895-4999 (toll free) during normal business hours. A complete copy of this application is available for inspection at the address listed in the previous sentence.

Persons who wish to formally participate in this proceeding, or who wish to express their comments concerning this application should contact the Public Utility Commission of Texas, Office of Customer Protection, P.O. Box 13326, Austin, Texas 78711-3326, or call (512) 936-7120 or toll-free at (888) 782-8477. Hearing- and speech-impaired individuals with text telephones (TTY) may contact the Commission at (512) 936-7136 or use Relay Texas (toll-free) 1-800-735-2989.
